Hello Javier,

Good Morning, I was not here in 2010 I came in in 2012. My predecessor Becky Ross was the Compliance Manager at that time i believe.

As of 2016 when the Tribe took over the site and have since then have Scape inc manage Mecca Resource Facility we have not required them to apply any chemical adhesives to the piles, as they are actively remediating the piles and substantially reducing the tonnage. However, Scape Inc., on a daily basis provides dust suppression on the piles with microbes to continue the remediation process.

If Andrew needs further information schedule a call and i can provide any information from when I have been here.

I hope this information is useful, let me know if you need further information.

Thanks,

Jacky

Hi Jacky,

I'm just following up with the email below from EPA. Do you have any of the below information available to share with EPA?

Thank you,

Javier

Hello Javier,

Have you gotten a chance to ask for the 2010 workplan we brought up the last time? There was also an integrated lease with Western? Also, my division director, Amy Miller, let me know she worked with your director, Jacquelyn Barnum, before on Western Environmental, and wanted to ask when was the last time chemical adhesive had been applied to the piles. Do you have a copy of that plan to apply the adhesives and at what frequencies? Thanks very much again!

- Andrew

Hi Andrew,

Could you please update me if you guys have finalized the report on the inspection on November 17th at the Desert View Power Plant? If so, who may I contact for the information?

Best,
